DREAD DELAY.

Murderer Kemmler Has Not Yet Felt the Deadly Shock.

All About Auburn Prison Silent As the Walls Themselves.

But the Little City Outside Stirred by Many a Tale.

A Midnight Story of the Arrival of Hack-Loads of Men.

THE METROPOLIS DAY BY DAY.

There is a mysteriousness about every one connected with the big stone-walled prison—the theatre.

For the time, truthfulness is at a discount, and every man from Warden Durston down to the lowest inmate of the institution, vies with his neighbor in tergiversation.

The Warden is demonstrating what he meant when he told an EVENING WORLD reporter that he alone would boss the legal extermination of William Kemmler. He has put out a word to every one of his underlings, and even Mrs. Durston, to go the privilege of her sex and does not fail.

When any one dares venture a statement regarding the poor fellow awaiting death in his basement cell, or about the awful event that is about to take place, it is sure to be contradicted by the next breath, or indeed of its predecessor from the same lips.

Warden Durston alone is voluble, and here are three samples of his volubility: To an EVENING WORLD reporter he stated Thursday that he was going next day to Long Island City and was some parties about some hollow-iron work.

To another reporter, at Albany, he told that he was going to Newark to have some repairs done to the volt-meter, a part of the apparatus to be used in the electrocution.

To another EVENING WORLD reporter, who came with him to the prison on Sunday morning, he said the volt-meter and the hollow iron stories were newspaper fakes and that his errand away had had no bearing at all on the execution, but that he had been to Albany to file his monthly report and had then taken a run down to the seashore.

Mrs. Durston informed an EVENING WORLD reporter that she had not seen Kemmler in many days, and old Daniel McLaughlin, Kemmler's watch, says that she visits him in his cell twice a day.

Against the odds of such indirectness a score or more of newspaper reporters are struggling to give their readers a true story of the last hours of the rat who has been baited in this great stone-walled trap for fifteen months, and seek to describe faithfully the taking off of the murderer of Tillie Ziegler.

Yesterday it was the story on the lips of every one in Auburn that the murderer, in the case of death had become hopelessly insane through the terrible strain of these weary months; that his bodily health had deserted him, and that he was fast becoming a drivelling idiot, unfit to kill and unfit to live.

Up to today the Rev. Dr. Houghton, Kemmler's spiritual adviser, had maintained a dignified silence; but when he found several newspapers announcing that his proteges had broken down and was insane, he broke his silence.

Dr. Houghton, sitting with his good wife in the cozy parsonage of the First Methodist Church, after gravely considering, said: "I am convinced of nonreason for the story, William Kemmler is a well man, both physically and mentally. He eats well, sleeps well and spends his time in talking, reading from primers and practicing his handwriting."

"There has been an arrest change in him since he came to Auburn Prison. He is less an animal, more a man. I see him two or three times each week. I saw him Saturday. I talk with him and we kneel and pray together."

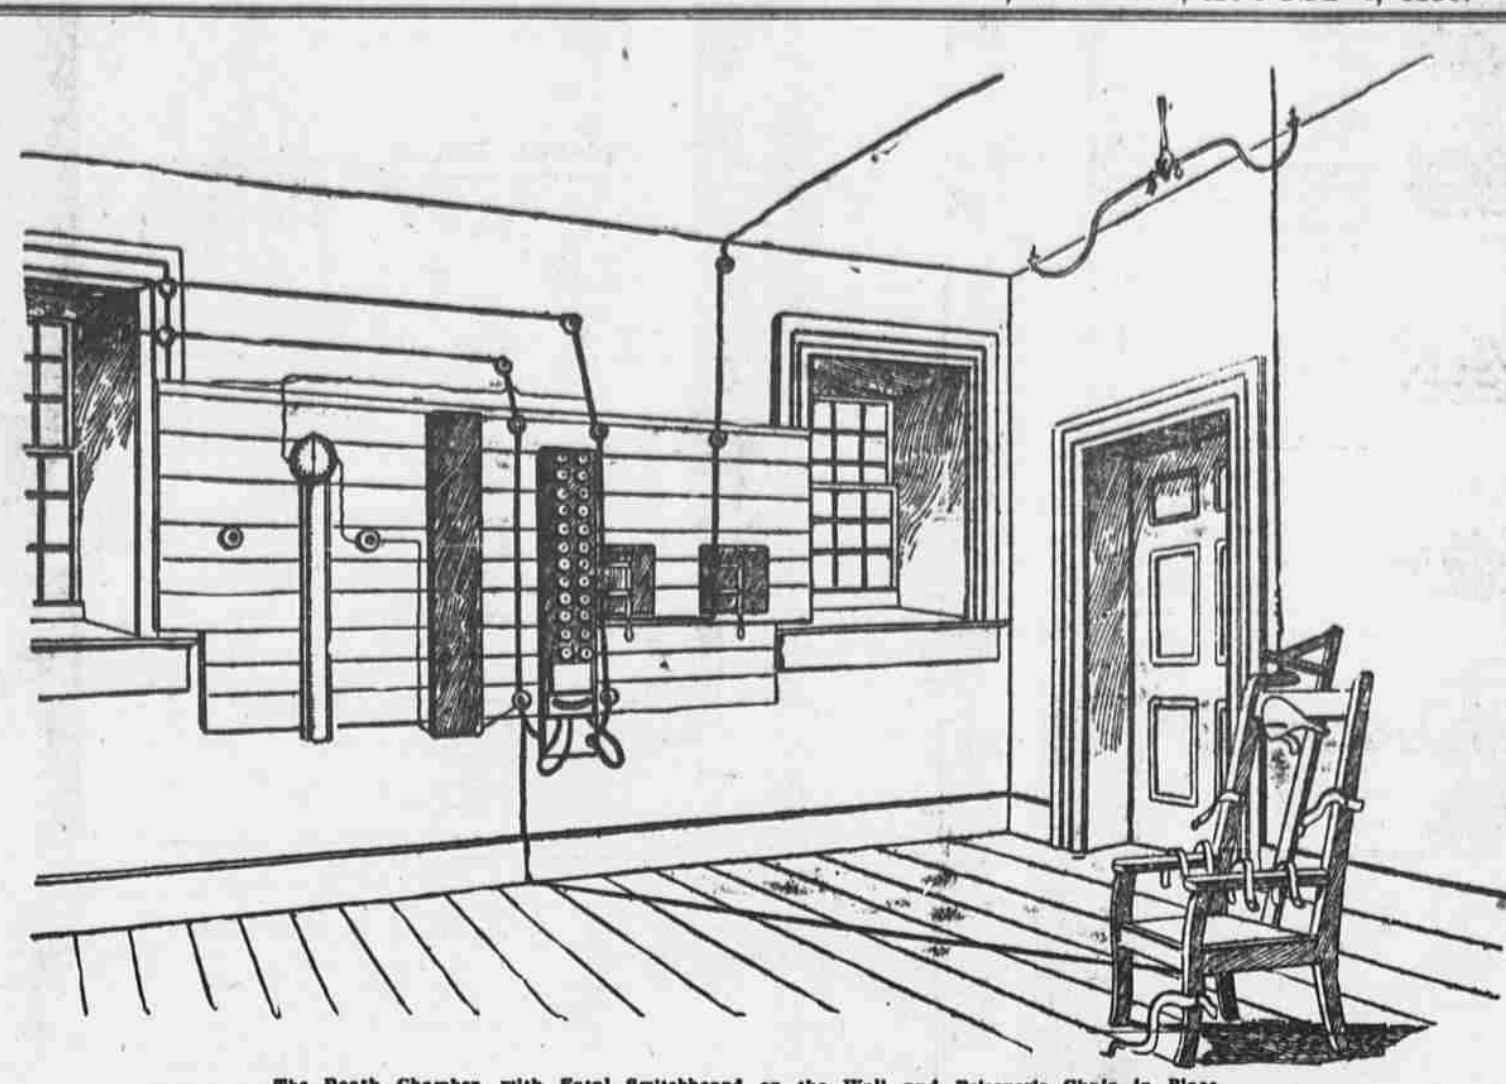

"He acts as if he felt, and he says he does feel, the enormity of his crime; that he should be punished for it and that he is ready to receive that punishment. He says he would rather die in the chair than to live and go back to his old ways—rather die than be imprisoned for life."

Dr. Sawyer, the prison physician, a frank old practitioner, says: "I have never been called upon to attend Kemmler, and his health is excellent."

An EVENING WORLD reporter, while in the prison last evening, saw that which would seem to substantiate Dr. Houghton's story, in part at least.

It was a tray on which was William Kemmler's Sunday dinner, consisting of a big rare beefsteak, two potatoes, two large slices of white bread and butter, scrambled eggs, a dish of sauce and a cup of tea—all cooking hot from the prison kitchen.

As this tray, in the hands of a colored convict, passed down the stairs to the cell of the condemned man the reporter wondered if it would be the last dinner he

The Death Chamber, with Fatal Switchboard on the Wall and Prisoner's Chair in Place.

poor fellow would ever partake of; but there was but one man in the world who could answer that question, and he had steadfastly declared that he did not know.

This little city shook off its lethargy last evening and began to display some interest in the event about to take place in its midst. Mrs. Durston and the lady who had been her guest for several days slipped lightly down the broad, high prison stoop of iron at 7 o'clock last evening, and, passing out through the massive iron gateway where Keeper Griffin stands sentry, embarked on the eastbound New York Central train at the station just across State street.

This was immediately construed to mean that the rat in trap was about to be killed, and little knots of people gathered at the barred front of the prison yard and stared at the ivy-clad walls of the south wing, where a faint light, glimmering from out of the interstices of the thick foliage, denoted the iron-barred window of the chamber of fate.

At 11 o'clock, Policeman Roseboom informed an EVENING WORLD reporter that while he was on the northern outskirts of the town, an hour before, he saw two hacks full of men drive in from the direction of Port Byron, a station on the New York Central through line.

A citizen was found who declared that he saw two hacks discharge their cargoes of men at the prison gate.

The story was soon in the mouth of every belated Auburnian, and many who had sought their virtuous couches arose and hastened on foot to the prison, where a dozen sleepy reporters were awakened by their sentinels; and notwithstanding Warden Durston's repeated assertions that there would be no uneasy hurry in disposing of Kemmler, and positive statement that the execution would not take place on Monday, there was a water-gate upon the prison by a hundred people, and continued by the reporters till daybreak.

The 7 o'clock train rolled in from the east, and the first person to step off was Warden Durston. He had boarded the train which bore his wife to Syracuse, last night, clambered on at some point up the railroad yard above the depot.

Still, none of the eminent pathologists and electricians, court officials and others, who assembled here in April as invited witnesses of the execution, had arrived, and the prison was barren of information as an execution.

The Warden still declared that the hour for the execution had not been fixed, and every one else connected with the institution was silent. Again the sceptical Auburnians scoffed and offered small wagers that the man in the silent cell would die of old age.

Some offered reasons of greater or less moment for this disbelief, and the reasons were as varied as those who entertained them. The most popular idea was that the powerful electrical corporation which interceded before and saved Kemmler for a little longer, would come up again this time with a term injunction restraining Warden Durston from using the Westinghouse dynamo for the execution on the ground that it was sold by a company subject to the restriction that it was to be used only for electric lighting.

Thus when it became known that last evening a small man, a stranger, leaped over Clerk Caney's desk at the Osborne House and asked in a half whisper: "Has the Westinghouse man arrived yet?" The supporters of the injunction idea felt very confident, indeed.

Another idea was that the newspapers were misled into printing stories of Kemmler's falling mind as a starter in a scheme for applying for a commission in lunacy to see if Kemmler were not mad.

Another story was that Warden Durston, who was at Clinton Prison last week with his electrical apparatus, which was to have been used in the execution of Joseph Chapman, was very busy there, posing as an electrical expert, and that he was much overtaxed when Gov. Hill committed the French Canadian's sentence and again made it certain that Durston, and not Warden Fuller, of Clinton Prison, must make the first execution with the new machine.

Up to this time the machine was in perfect order; but suddenly Warden Durston discovered that the volt-meter was out of order; and what could be easier than for an electrician to fix the volt-meter so that it would register the required 1,990 to 2,000 volts when the machine was really only putting out 1,500 or 1,600 volts, and thus saving the victim with \$500 or some other voltage which he could stand.

That would kill Kemmler, but it would

forever kill electrocution as a certain and humane mode of capital punishment.

For twenty-four hours there has been industrious talk of the power of the State's dynamo, and two mysterious strangers have been seen in the centre of listening barroom groups, all over the city, discussing and agreeing that these Westinghouse dynamos, like the one in Copper John's bar house, were made expressly for lighting purposes, and so made that they would be harmless to human life.

Meanwhile, down in the silent cell, Kemmler is whittling away his last hours on earth by writing his name on pieces of cardboard, doubling his hair before a little mirror securely imbedded in the stonework, just outside the gratings, and listening to the tum-tum of Frank Fish's banjo in the other death cell, before which paces up and down Keeper Lawrence Donlan, who denies that he is guarding the murderers or either of them.

The Canadian murderer Fish is an expert banjo player, and his music has helped materially in lightening the burden of Kemmler's confinement.

The two men are almost of an age, only Fish is a light-hearted, bright-eyed, cheery man, who became a murderer through misadventure, while Kemmler is dull, boisterous, and, while Kemmler is dull, Fish sings, whistles, laughs and is merry at times. He was even before a new trial was granted to him.

He is a thick-skulled, dull and heavy fellow, with a notion of being a dandy, and the sentimentalism of an ox in the stall. Fish sings, whistles, laughs and is merry at times. He was even before a new trial was granted to him.

The prison is as quiet as the grave to-day, but opposite the entrance the Western Union has opened a temporary office in the place on Monday, there was a water-gate upon the prison by a hundred people, and continued by the reporters till daybreak.

No Respite for Kemmler Asked Yet. SPECIAL TO THE EVENING WORLD. ALBANY, Aug. 4.—At noon to-day Gov. Hill said he had not thus far received any application for a stay of execution in the Kemmler case, and knew nothing about efforts looking to a respite for the condemned man.

INVITED TO THE EXECUTION.

Buffalo Men Asked to Report at Auburn to-Morrow Evening. SPECIAL TO THE EVENING WORLD. BUFFALO, Aug. 4.—Invitations to Kemmler's execution have been received in this city by persons selected by Warden Durston.

District Attorney Quimby, Sheriff Jenkins and the others will leave to-night for Auburn.

The invitations instruct the recipients to report at Auburn Prison at 7 o'clock to-morrow night, and the impression prevails here that the electrocution will take place soon afterwards.

The holders of the invitations have exercised the greatest secrecy and refuse to exhibit them.

Dr. Southwick, one of the Electric Commission, denied to-day that he had received any official notification to attend.

Electrician Barnes Noted Not to Come to Auburn. SPECIAL TO THE EVENING WORLD. ROCHESTER, Aug. 4.—Electrician Barnes of this city, had intended to start at noon to-day for Auburn to superintend the execution of Kemmler, but was telegraphed by Warden Durston this morning not to come.

No explanation of this order was given. Mr. Barnes feels confident that the machinery at Auburn will do the work effectively and that the condemned man will die instantly, without pain.

FOR HER CHILDREN'S SAKE. HOTTEST DAYS OF THE YEAR.

If Mrs. J. Martin Returns All New York Scorching Under a Superheated Caloric Wave.

A Pathetic Brooklyn Story Revealed by an Advertisement.

THE HOT weather predicted by Sergt. Dunn last week arrived in Gotham this morning by limited express from the West. It promises to be a cooker.

Even the fervent felt that the couldn't stand it, and whether it was on this account or because he dreaded a popular uprising of the citizens of Gotham against the dispenser of such tropical weather, he has made himself scarce.

Having obtained leave of absence from the War Department, he has betaken himself to a cool and secluded spot somewhere on the ocean side of Long Island, where for two weeks to come he will refrain from directing the course of hot waves and tornadoes upon this devoted town, and may watch from a safe distance the effects of his latest meteorological discovery.

He has left the business in charge of Sergt. L. N. Jeannofsky, who appears at first to be a more merciful hot weather deity than his predecessor.

"It is going to be hotter than ever," he said to an EVENING WORLD reporter this morning, "and what is more, there isn't a man here in sight that can do New York any good."

"To show you how rapidly it is heating up, let me tell you that the thermometer at 1 o'clock this morning, 78 at 2 o'clock, 81 at 3 o'clock, 84 at 4 o'clock, 87 at 5 o'clock, 90 at 6 o'clock, 93 at 7 o'clock, 96 at 8 o'clock, 99 at 9 o'clock, 102 at 10 o'clock, 105 at 11 o'clock, 108 at 12 o'clock, 111 at 1 o'clock, 114 at 2 o'clock, 117 at 3 o'clock, 120 at 4 o'clock, 123 at 5 o'clock, 126 at 6 o'clock, 129 at 7 o'clock, 132 at 8 o'clock, 135 at 9 o'clock, 138 at 10 o'clock, 141 at 11 o'clock, 144 at 12 o'clock, 147 at 1 o'clock, 150 at 2 o'clock, 153 at 3 o'clock, 156 at 4 o'clock, 159 at 5 o'clock, 162 at 6 o'clock, 165 at 7 o'clock, 168 at 8 o'clock, 171 at 9 o'clock, 174 at 10 o'clock, 177 at 11 o'clock, 180 at 12 o'clock, 183 at 1 o'clock, 186 at 2 o'clock, 189 at 3 o'clock, 192 at 4 o'clock, 195 at 5 o'clock, 198 at 6 o'clock, 201 at 7 o'clock, 204 at 8 o'clock, 207 at 9 o'clock, 210 at 10 o'clock, 213 at 11 o'clock, 216 at 12 o'clock, 219 at 1 o'clock, 222 at 2 o'clock, 225 at 3 o'clock, 228 at 4 o'clock, 231 at 5 o'clock, 234 at 6 o'clock, 237 at 7 o'clock, 240 at 8 o'clock, 243 at 9 o'clock, 246 at 10 o'clock, 249 at 11 o'clock, 252 at 12 o'clock, 255 at 1 o'clock, 258 at 2
